a division of Riverside Winnelson Co.

2185 La Crosse Avenue

Colton, CA 92324

P (909) 420-0072 F (909) 420-0088

A list of helpful tips:

- If you plan on replacing a toilet, note the measurement from the wall to the center of the bolt holes. The standard distance is 12". If it is not, it can be 10" or 14".
- Bathtubs require sufficient hot water. If the water heater does not heat enough water, a bath could end up being less than relaxing.
- If you are interested in installing a custom shower system, note the size of your rough valves. Are they 1/2", 3/4", or 1"?
- Be sure to take door measurements when opened and when closed. Also, measure the door frame. You do not want your door to obstruct your cabinet space when doors or drawers are open.

Products to Consider:

- **Bidet toilet seats** provide unique features that an ordinary seat just will not offer. The features include seat warming, deodorizing, and cleansing. This type of seat fits on most toilets. It requires a GFI outlet, which can be installed by any electrician.
- **Accessories** come in a wide variety of finishes and styles. Matching accessories can complete the look of any bathroom or kitchen.
- **Ventilation** is often overlooked, but it is very important in preventing mold. Adequate ventilation will suck up moisture, leaving any room a safe place to reside. Additionally, many style options are available.
- Try to stay open-minded regarding your **faucet** selection. There are so many styles and finishes available that the perfect faucet is easy to overlook. Single-handle faucets are particularly convenient and worthy of consideration.
- **Tankless water heaters**, as opposed to tank water heaters, lessen the monthly gas bill by heating water only when needed. They are less spacious, easy to maintain, and provide a continuous source of hot water.
- A **towel warmer** is a nice accessory that allows for a warm after-bathing experience.
- **Steam units** provide a home spa experience that is worth considering.
- **Radiant heat** is a great addition to a bathroom with a cold tile floor.
- **Potfillers** make the dreaded task of filling and transferring big pots and pans an ease. Simply install a wall-mount or deck-mount potfiller by the stove.
